

SOLUTION FOR BANKS

Re-Think Security With an Intelligent, PCI Compliant Video Surveillance System

With 90-plus days of dual-storage video retention, world-class end-to-end encryption, and pixel-perfect high definition imaging capable of capturing every detail, Verkada is redefining the way banks approach security. From a single branch or ATM to multiple branch locations, Verkada is simple to deploy, scale, and manage while always ensuring the high quality video and coverage for all clients, staff, and assets.

ALL-IN-ONE PCI COMPLIANT SECURITY

- + Scales With Ease**
Cameras can be installed anywhere without the need of NVRs or DVRs
- + See Who Comes and Goes**
Search video based on motion alerts and detect unusual or unexpected activity
- + Protected From Tampering**
Tampering attempts are automatically detected with instantaneous alerts
- + Prevents ATM Fraud**
Install cameras inside ATMs to detect events at payment capture devices
- + Stores Over 90 Days of Footage**
All footage is stored directly on the camera, with options from 30-120 days
- + Stays Safe & Secure**
Cameras are automatically updated with the latest security enhancements

SIMPLE, POWERFUL VIDEO SURVEILLANCE

Choosing Verkada means no longer having to maintain outdated equipment like NVRs and DVRs, parsing through hours of unnecessary footage, or jumping through hoops to get access to cameras in emergency situations.

With Verkada, footage is always accessible, analyzed, and safely stored on camera as well as in the cloud.

1. Each camera encrypts and stores video in a solid-state drive
2. Cameras communicate securely with Verkada's reliable cloud service
3. Securely view and manage video 24/7 on any device, anywhere
